What practitioners say

Our company values giving our clients consistent, quality service — and Julian and his team’s SRMBOK products have been invaluable in helping us do that. If you’re a security risk practitioner looking to take your business to the next level and streamline efficiency, I strongly recommend SRMBOK — you won’t be disappointed.

— Khabeer Rockley, SmartSec Security Solutions

“

As a risk reducer for organizations, the SRMBOK helped me enormously and meticulously on the domains for asset-centric scoping, stakeholder and third-party risk handling, resilience over prevention, practice areas that map onto real functions and a defensible basis for prioritization.

— Shahab Al Yamin Chowdhury, Enterprise Cybersecurity Architect

“

The SRMBOK Library brings together a substantial collection of practical security risk management information and resources in one place. It is particularly useful for practitioners looking for practical guidance they can apply to real-world security management problems. Highly recommended.

— Simon Artz, Security Risk Management Certified Professional
